EDUCATION

AISSMS Institute of Information Technology
B.Tech in Information Technology, Third Semester

Pune, India
2025 – 2029 (Expected)

- CGPA: 8.43 / 10 (First Year)

EXPERIENCE

Perplexity AI
Student Campus Ambassador

Pune, India
Oct 2025 – Dec 2025

- Promoted student adoption of Perplexity AI through peer outreach, referral campaigns, and campus visibility initiatives.
- Drove 40+ registrations and earned \$200+ in referral incentives within the first month by converting student interest into sign-ups.
- Connected product promotion with student engagement, tracking measurable response and conversion rates.

Infinix Campus Connect
Event Main Coordinator

Pune, India
2026

- Coordinated a full-day, sponsor-backed campus event in partnership with Infinix and Call of Duty Mobile, managing sponsor relations, logistics, and on-ground execution.
- Drove 500+ registrations and 50+ pieces of user-generated content on Instagram and other platforms, and secured a ₹10,000 goodwill contribution from the sponsor — the largest event under the current student body's tenure.

DESSA (Department of Engineering Sciences Students' Association)
Event Management Head

Pune, India
2025 – 2026

- Led the event management vertical for a full academic year, planning and executing multiple department-wide events end to end.
- Managed cross-functional teams to handle logistics, scheduling, and on-ground coordination across the association's event calendar.

ACM (Association for Computing Machinery) — AISSMS IOIT Chapter
Event Management Member

Pune, India
2025 – 2026

- Active member of the event management team, contributing to the planning and execution of multiple chapter events.
- Served as a team member for Model United Nations (MUN), Youth Parliament, and Tenet Hack, supporting event planning and on-ground execution.

Training & Placement Office, AISSMS IOIT
Joint Secretary, Innovative Domain — Anchor & Coordinator

Pune, India
2025 – 2026

- Anchored and coordinated placement drives, pre-placement talks, and recruitment sessions hosted by the Training & Placement Office.
- Liaised between recruiters, faculty coordinators, and students to ensure smooth scheduling and on-ground execution of placement events.

PROJECTS

VaariSarathi | *Flutter, Firebase, Google Maps SDK, Geolocator*

- Built with a 4-member team in 24 hours at Vaarithon, a national-level hackathon at MMCOE; finished as a finalist among 450+ teams.
- Designed a GPS-based group tracking system for pilgrim groups (dindis) with live location markers and geofenced 500m proximity alerts.
- Built a crowdsourced Lost & Found module with location-, time-, and keyword-based auto-matching for lost persons and items.
- Implemented an SMS-based SOS fallback for members without smartphones, matching inbound alerts to registered members and surfacing their medical profile and last-known location to the group leader.

IRIS: A Low-Cost Human-Aware Collision Avoidance System | *Arduino, Sensors, C++*

- Built at Ideathon, a national-level hackathon at AISSMS IOIT; patent application filed and currently pending.
- Designed a low-cost, sensor-based collision prevention system with an “alert-first” strategy — warning the driver before automated braking engages.
- Built a working RC-car proof-of-concept demonstrating real-time obstacle detection, audio/visual alerts, and controlled braking intervention.

TECHNICAL SKILLS

Languages: C++, Python, Java

Frameworks & Tools: Flutter, Firebase, Git, GitHub, VS Code

AI / ML: PyTorch, NumPy, scikit-learn
